PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience in building web and mobile applications. Specialized in React, React Native, and Node.js. Proven track record of delivering efficient and scalable solutions across diverse projects. Committed to continuous learning and innovation in software development.

PROFESSIONAL EXPERIENCE

Software Engineer @ Dabeeb   May 2022 - Present

Dabeeb ARS

Currently working on the frontend of an Expo mobile application for peer-to-peer accommodation rentals. Developing UI components and implementing features such as property listing, booking management, user reviews, and payment integration screens.

Dabeeb FMS

Contributed to the frontend development of a web-based fleet management system using React.js. Implemented interactive dashboards for real-time vehicle tracking, maintenance scheduling, and performance analytics.

Dabeeb ERP

Created a full-stack inventory management application with React Native frontend, Express.js and Hasura backend, integrating VendHQ API. Focused on enhancing system capabilities and streamlining operations across multiple branches.

Dabeeb App

Developed a comprehensive mobile application using React Native, Express.js, and Hasura for scooter and bicycle rentals. Implemented robust user authentication, real-time availability tracking, and integrated secure payment processing.

Jr. Software Engineer @ Gigalabs   Feb 2021 - Mar 2022

Linesheets

Contributed to the development of an online platform for customizing and sharing product collections. Implemented key features using React.js for the frontend and Express.js for the backend, enhancing user experience and platform functionality.

New York Adventure Club

Worked on a tour company platform providing insider access to city secrets. Developed both frontend and backend components using React.js and Express.js, focusing on improving tour booking and management systems.

Bukit

Developed components for a marketplace connecting end-users to operators via white-labeled SaaS technology. Utilized Next.js for the frontend, Express.js for the backend, and MongoDB for data management, contributing to a seamless aggregator experience.

Furniture Bank California

Developed a platform connecting people with excess furniture to those in need. Implemented frontend and backend solutions using Next.js and MongoDB, streamlining the furniture donation and distribution process.

Financial Tracking System

Contributed to the frontend development of a transaction and inventory management system using React.js. Focused on creating intuitive interfaces for financial data visualization and management. (Client did not disclose the name of the project)

Skills

Languages & Frameworks

JavaScript, TypeScript, React.js, Next.js, React Native, Expo, Node.js, Express.js, GraphQL, HTML, CSS, Redux, Tailwind, Bootstrap, and SQL.

Tools & Platforms

VS Code, Git, Gitlab, Github, Postman, Docker, MongoDB, PostgreSQL, Firebase, Vercel, Heroku, Hasura, Linux, Microsoft Office, Mattermost, Slack, Trello, Jira, and Asana.

Personal Projects

Taskify

Developed a collaborative task management platform using Next.js and PostgreSQL. Implemented features for organization and board creation, card management with drag-and-drop functionality, and integrated payment processing.

Pixel Muse

Developed a suite of automated bots using Next.js and Node.js for generating and distributing random color pixel images across Twitter and Telegram platforms. Implemented image generation algorithms and social media API integrations.

Phanox

Developed a full-stack e-commerce platform specializing in headphone sales using Next.js, Sanity, and Stripe. Implemented features including product cataloging, user authentication, shopping cart functionality, and secure payment processing.

Bookit

Created an online reservation system using Next.js, Stripe, and MongoDB to streamline the booking process for hospitality businesses. Implemented real-time availability updates, user account management, and integrated payment gateway for seamless transactions.

Shopit

Built an e-commerce application using React.js, Express.js, Stripe, and MongoDB. Developed features such as product search, filtering, user reviews, and order management to enhance the online shopping experience.

Education

Gujrat Institute of Management Sciences (PMAS AAUR)   Gujrat, Pakistan
Bachelor of Science (Computer Science)

Academic Project

Find Friend (Final Year Project)

Developed a mobile application using React Native and Firebase for real-time chat and location sharing. Implemented features including user-to-user messaging, real-time location tracking with Google Maps integration, and route visualization.
